Main Product:metal materials : cast iron, scrap steel, silicon iron, manganese iron.ect; and all casting materials

Jiangsu RenShen Cast Iron Co., Ltd. established in 1993, has developed into a comprehensive enterprise integrating production, processing, and sales of casting raw and auxiliary materials.The company has an advanced casting pig iron warehouse with clear classification and standardized storage, making it a leading domestic distribution center for high-quality casting pig iron. At the same time, we are the Chinese agent for Russian "Tulachermet" casting pig iron, Japanese "Kaka" slag remover, "Xinfute" mold release agent, and refractory materials from the Allied mineral, providing a comprehensive casting material solution.

Jiangsu Tianhong Machinery Industry Co., Ltd. is a high-tech enterprise, specializing in R&D, manufacturing and marketing the high end intelligent equipment. It is situated in Douzhuang Industrial Zone, Danyang City with the registered capital of US\$10 Million, occupied land area of 26600m2, plant area of 11000m2 and 210 employees. It was founded in August 2007 and put into production in July 2009, mainly developing the intelligent casting equipment for Aluminum alloy foundries and other peripheral equipment, specialized equipment for Aluminum alloy wheel manufacturing, fixtures and chucks for precision machineries, such as CNC lathes and machining centers, etc. In 2011, the company started to develop the automatic production lines, serving for the industries of automotive components, high-speed train parts, equipment manufacturing and light weight castings of new energies automobiles, etc.

Liaoning Prate Environmental Protection Technology Co. LTD is specialized in environmental protection equipment research and development, design, production and manufacturing, installation and commissioning, after-sales service, technical consultation as one of the science and technology enterprises. Our company has rich experience in dust and flue gas treatment. The side-inserted flat bag and low-pressure pulse long cloth bag dust removal equipment developed and produced by our company adopts blower or pulse valve back blowing, which is controlled by industrial PLC combined with sensor and frequency conversion technology to realize automatic operation and online monitoring of dust collector. The optimized products have the characteristics of less floor space, good filtration effect, low maintenance and operation cost, stability and reliability.

It is well-known that tools and dies are the essence of industrial manufacturing, as in the case of Thailand they play a supportive role to other industries such as the automobile industry, electrical appliances industry, electronics industry, and so on. It is, therefore, necessary to perpetually develop the industry to meet with the striking growth of the demand both at home and abroad as well as to keep pace with modern production technology.

Thai Tool and Die Industry Forum was formed in 1989 and was subsequently upgraded to become the Thai Tool and Die Industry Association in 1992, with the aim to be a core center for Mould and Die Industry. Now TDIA has about 500 members and a Board of Directors which is comprised of 15 people.

Yunnan Taibiao Precision Casting Company specializes in the manufacturing of high-end CNC machine tool castings. The company is equipped with a range of advanced technologies, including resin sand, clay sand, vanishing mould, 3D printing and other moulding lines, over 500 sets of CNC machining centres, physical and chemical laboratories, a constant-temperature precision workshop and more. This enables the company to produce and process a wide range of products, including large (heavy) precision CNC machine tool castings, with a weight of up to 50T. The company is capable of processing 110,000 tonnes of large (heavy) precision CNC machine tool castings, with a single piece weighing up to 50T. The products are mainly for vertical, plus, horizontal, gantry, lathe, boring and milling machines and other high-precision, high-stability functional kits. The products are mainly high-precision and high-stability functional kits for vertical, horizontal, gantry, lathe, boring and milling machines.

PROTECTION TECHNOLOGY CO., LTD.**

Add: Quzhou Changshan County Xindu
District industrial zone

Email: liuzhiqinglled@qq.com

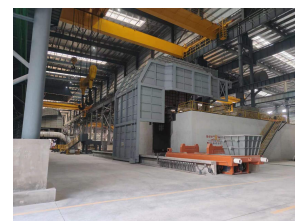

Tel: 15658565558

Main Product: Air pollution environmental
protection dust removal equipment

The company's main products for air pollution treatment series: dust treatment, organic waste gas treatment. Specializing in the production of dust collectors, waste gas treatment equipment, for the ore furnace, medium-frequency furnace, electric arc furnace, Refining Furnace, converter and other supporting pollution treatment and purification equipment. It is mainly used for dust treatment, waste gas treatment, flue gas desulphurization, purification, pneumatic conveying and material recovery in steel making, foundry, metal smelting, ore smelting and other industries. The company has professional design and technical personnel, skilled engineering installation team, mature production technology, can undertake a variety of environmental engineering design and installation and technical advice.
